IMPECCABLE QUALITY • WORLD CLASS TURN TIMES • OUTSTANDING VALUE

GE CT58 COMPONENT REPAIR AND OVERHAUL

Magellan Aerospace Turbine Services, LLC (MATS) is an FAA/EASA approved repair and overhaul facility, focused on providing high quality services to operators of small gas turbine engines. Located in Glendale, Arizona, our 27,000 square foot, climate controlled facility is equipped with an extensive array of equipment to support manufacture, repair, and overhaul and is staffed by a team of highly experienced industry experts

MATS has been supporting General Electric T58/CT58 series engines with component repair and overhaul for more than 15 years.

Leveraging our industry leading repair capabilities and extensive engineering experience, MATS offers customers impeccable quality, world class turn times, and outstanding value. MATS is a subsidiary of Magellan Aerospace, one of the world's leading aerospace companies and delivers an extensive array of services at an unmatched value.

ABOUT MAGELLAN AEROSPACE

Magellan Aerospace is a global enterprise providing integrated products and services to the aerospace industry worldwide. Magellan designs, engineers, and manufactures aeroengine and aerostructure assemblies and components for aerospace markets, advanced products for military and space markets, and complementary specialty products. Magellan Aerospace is a public company whose shares trade on the Toronto Stock Exchange (TSX: MAL), with operating units throughout Canada, the United States, the United Kingdom, Poland, and India.
