

Magellan Aerospace Corporation Second Quarter Report June 30, 2008

Magellan Aerospace Corporation (the "Corporation" or "Magellan") is listed on the Toronto Stock Exchange under the symbol MAL. The Corporation is a diversified supplier of components to the aerospace industry. Through its network of facilities throughout North America and the United Kingdom, Magellan supplies leading aircraft manufacturers, airlines and defence agencies throughout the world.

Financial Results

On August 12, 2008, the Corporation released its financial results for the second quarter of 2008. All amounts are expressed in Canadian dollars unless otherwise indicated. The results are summarized as follows:

	Thre	onths ended ine 30		Six-	nths ended ine 30	
(Expressed in thousands, except per share amounts)	2008	2007	Change	2008	2007	Change
Revenues	\$ 172,108	\$ 150,283	14.5%	\$ 333,203	\$ 294,338	13.2%
Gross Profit	\$ 17,824	\$ 16,213	9.9%	\$ 35,145	\$ 31,462	11.7%
Net Income (Loss)	\$ 783	\$ (1,734)	-	\$ 2,834	\$ (3,481)	-
Net Income (Loss) per share	\$ 0.02	\$ (0.12)	-	\$ 0.11	\$ (0.24)	-
EBITDA*	\$ 13,758	\$ 9,230	49.1%	\$ 29,249	\$ 18,743	56.1%
EBITDA* per share	\$ 0.76	\$ 0.51	49.0%	\$ 1.61	\$ 1.03	56.3%

This quarterly statement contains certain forward-looking statements that reflect the current views and/or expectations of the Corporation with respect to its performance, business and future events. Such statements are subject to a number of risks, uncertainties and assumptions, which may cause actual results to be materially different from those expressed or implied. The Corporation assumes no future obligation to update these forward-looking statements.

*The Corporation has included certain measures in this quarterly statement, including EBITDA, the terms for which are not defined under Canadian generally accepted accounting principles. The Corporation defines EBITDA as earnings before interest, taxes, depreciation and amortization and non-cash charges. The Corporation has included these measures, including EBITDA, because it believes this information is used by certain investors to assess financial performance and EBITDA is a useful supplemental measure as it provides an indication of the results generated by the Corporation's principal business activities prior to consideration of how these activities are financed and how the results are taxed in various jurisdictions. Although the Corporation believes these measures are used by certain investors (and the Corporation has included them for this reason), these measures may not be comparable to similarly titled measures used by other companies.

Management's Discussion and Analysis

In the second quarter of 2008, the Corporation generated an increase in revenue through new program introductions and pricing initiatives, and maintained gross profit growth, in spite of new program start-up costs, through efficiencies in operations and administration.

Improvements continue in EBITDA, demonstrating improved fundamentals in the Corporation's operations and commercial activities, marked by growth across all three geographic regions, and growth in spite of currency exchange fluctuations and some product mix impacts in the second quarter.

On June 24, 2008 the Corporation amended and restated its credit agreement with its existing lenders. Under the terms of the amended and restated agreement, the maximum amount available under the operating credit facility was increased by \$20 million to a Canadian limit of \$95 million and a US limit of \$90 million with a maturity date of May 23, 2009. The facility is extendible for unlimited one-year renewal periods, subject to mutual consent of the syndicate of lenders and the Corporation, and continues to be guaranteed by the Chairman of the Corporation. The amended and restated agreement eliminated all of the financial performance covenants except for a fixed charge coverage ratio. Magellan used a portion of the additional credit facility capacity to retire the \$15,000,000 bridge loan, due July 31, 2008.

For additional information, please refer to the "Management's Discussion and Analysis" section of the Annual Report available on www.sedar.com.

Revenues

	 Thre	onths ende	ed	Six-months ended June 30						
(Expressed in thousands)	 2008	2007	Change	2008 2007 (Change		
Canada	\$ 79,002	\$ 73,139	8.0%	\$	151,981	\$	137,781	10.3%		
United States	59,064	47,251	25.0%		113,346		95,314	18.9%		
United Kingdom	34,042	29,893	13.9%		67,876		61,243	10.8%		
Total revenue	\$ 172,108	\$ 150,283	14.5%	\$	333,203	\$	294,338	13.2%		

Consolidated revenues for the second quarter of 2008 were \$172.1 million, an increase of \$21.8 million or 14.5% over the second quarter of 2007. Increased sales in both Canada and the United States can be attributed to Magellan's increased participation on the Boeing and Airbus family of parts from the second quarter of 2007. The acquisition of Verdict Aerospace Components Ltd. ("Verdict") contributed in part to the increased sales in the United Kingdom. Sales in the United Kingdom, excluding the effect of the acquisition of Verdict, in native currency for the second quarter increased 14.3% over the comparative quarter in the prior year as the production of parts for Airbus increased in the quarter.

Gross Profit

	Thre	onths ende ne 30	d	Six-months ended June 30				
(Expressed in thousands)	2008	2007	Change		2008		2007	Change
Gross profit	\$ 17,824	\$ 16,213	9.9%	\$	35,145	\$	31,462	11.7%
Percentage of revenue	10.4%	10.8 %		\$	10.5%		10.7 %	

Gross profits of \$17.8 million (10.4% of revenues) were reported for the second quarter of 2008 compared to \$16.2 million (10.8% of revenues) during the same period in 2007. Gross profit, as a percentage of sales, declined over the second quarter of 2007 due to a change in product mix. The decline in the value of the U.S. dollar versus the Canadian dollar during the second quarter of 2008, when compared to the second quarter of 2007, continued to mask the total impact of the improvements made by the Corporation. Had exchange rates remained the same as in the second quarter of 2007, gross margins would have been approximately \$2.5 million higher in the second quarter of 2008 at approximately 10.8% of revenues.

Administrative and General Expenses

	Three-months ended Six-months e June 30 June 30				 	
(Expressed in thousands)		2008		2007	2008	2007
Administrative and general expenses Foreign exchange loss / (gain) (Gain) loss on sale of capital assets	\$	11,133 534 (1,634)	\$	11,011 2,154 (4)	\$ 20,694 (1,056) (1,634)	\$ 22,536 2,523 19
Total administrative and general expenses	\$	10,033	\$	13,161	\$ 18,004	\$ 25,078
Percentage of revenue		5.8%		8.8 %	5.4%	8.5 %

Administrative and general expenses were \$10.0 million (5.8% of revenues) in the second quarter of 2008 compared to \$13.2 million (8.8% of revenues) in the same period of 2007. Administrative and general expenses before foreign exchange and the gain on the sale of capital assets were \$11.1 million (6.5% of revenues) in the second quarter of 2008 compared to \$11.0 million (7.3% of revenues) in the second quarter of 2007.

Interest Expense

	Three-m Jเ	onths ine 30		Six-months ended June 30			
(Expressed in thousands)	2008		2007		2008		2007
Interest on bank indebtedness and other long-term debt	\$ 3,788	\$	3,074	\$	7,195	\$	5,862
Convertible debenture interest	444		1,487		1,249		2,975
Accretion charge for convertible debt	64		590		306		1,174
Discount on sale of accounts receivable	1,187		1,021		2,268		1,835
Total interest expense	\$ 5,483	\$	6,172	\$	11,018	\$	11,846

Interest expense in the second quarter of 2008 was \$5.5 million, \$0.7 million lower than the second quarter of 2007. Interest and accretion expense in relation to the convertible debentures were lower in the second quarter of 2008 than the comparative quarter in 2007 due to a lower principal amount of convertible debentures outstanding which was offset by higher interest paid on an increased debt level in the current quarter in comparison to the same quarter of 2007.

Provision for (recovery of) Income Taxes

	Three-m Jเ	onths ine 30		Six-months ended June 30			
(Expressed in thousands)	 2008		2007		2008	2007	
Provision for current income taxes Expense (recovery) of future income taxes	\$ 208 1,317	\$	844 (2,230)	\$	208 3,081	\$	933 (2,914)
Total expense (recovery) of income taxes	\$ 1,525	\$	(1,386)	\$	3,289	\$	(1,981)
Effective Tax Rate	66.1%		44.4 %		53.7%		36.3 %

The Corporation recorded an income tax expense of \$1.5 million for the second quarter of 2008, compared to an income tax recovery of \$1.4 million for the second quarter of 2007. The effective rate of income tax expense was 66.1% in the second quarter of 2008 compared with a recovery of income taxes rate of 44.4% in the second quarter of 2007. The change in effective tax rates is a result of a changing mix of income across the different jurisdictions in which the Corporation operates and due to the unrecorded tax benefits derived from timing differences in Canada. Permanent differences in taxable income have a greater effect on the effective tax rate at low levels of income.

Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA)

In addition to the primary measures of earnings and earnings per share in accordance with GAAP, the Corporation includes certain measures in this MD&A, including EBITDA (earnings before interest expense, income taxes, depreciation, amortization and certain non-cash charges). The Corporation has provided these measures because it believes this information is used by certain investors to assess financial performance and EBITDA is a useful supplemental measure as it provides an indication of the results generated by the Corporation's principal business activities prior to consideration of how these activities are financed and how the results are taxed in the various jurisdictions. Each of the components of this measure are calculated in accordance with GAAP, but EBITDA is not a recognized measure under GAAP, and our method of calculation may not be comparable with that of other companies. Accordingly, EBITDA should not be used as an alternative to net earnings as determined in accordance with GAAP or as an alternative to cash provided by or used in operations.

	 Three-months ended June 30				Six-months ended June 30				
(Expressed in thousands)	2008		2007		2008		2007		
Net income (loss)	\$ 783	\$	(1,734)	\$	2,834	\$	(3,481)		
Interest	5,483		6,172		11,018		11,846		
Taxes	1,525		(1,386)		3,289		(1,981)		
Stock based compensation	295		395		613		650		
Depreciation and amortization	5,672		5,783		11,495		11,709		
EBITDA	\$ 13,758	\$	9,230	\$	29,249	\$	18,743		

EBITDA for the second quarter of 2008 was \$13.8 million, compared to \$9.2 million in the second quarter of 2007. Growth in revenues, higher gross profit and lower administrative and general expenses in the second quarter of 2008 compared to 2007 contributed to the increase in EBITDA for the current quarter.

Liquidity and Capital Resources

Cash Flow from Operations

	Three-months ended June 30					Six-months ended June 30			
(Expressed in thousands)		2008		2007		2008		2007	
Decrease (increase) in accounts receivable Increase in inventories Increase in prepaid expenses and other Increase in accounts payable	\$	3,111 (7,752) (652) 4,518	\$	7,599 (5,995) (7,627) 12,960	\$	(2,236) (18,990) (312) 5,604	\$	(5,010) (23,335) (8,441) 13,060	
Changes to non-cash working capital balances	\$	(775)	\$	6,937	\$	(15,934)	\$	(23,726)	
Cash provided by (used in) operating activities	\$	3,793	\$	9,027	\$	(1,951)	\$	(19,318)	

In the quarter ended June 30, 2008, the Corporation generated \$3.8 million of cash in its operations, compared to \$9.0 million in the second quarter of 2007. Cash was generated by decreased accounts receivable and increased accounts payable offset by an increase in inventories. Production inventories rose in response to increasing demand from the Corporation's customers.

Investing Activities

	Three-months ended June 30					Six-months ended June 30			
(Expressed in thousands)	<u> </u>	2008		2007		2008		2007

The Corporation amended its operating credit facility with its existing lenders on June 24, 2008. Under the terms of the amended agreement, the maximum amount available under the operating credit facility was increased by \$20 million to a Canadian dollar limit of \$95 million plus a US dollar limit of \$90 million, with a maturity date of May 23, 2009. The facility is extendable for unlimited one-year renewal periods by the agreement of the Corporation and the lenders and continues to be guaranteed by the Chairman of the Corporation. An annual standby guarantee fee in 2008 of 1.0% (2007 - 0.1%) of the guaranteed amount was provided by the Corporation in consideration for this guarantee. This standby fee was increased to 1.35% on June 24, 2008 in consideration for providing additional security for the Corporation's obligations. Due to this guarantee, interest is charged at the bankers' acceptance or LIBOR rates plus 1.0%, compared to the rate of bankers' acceptance or LIBOR rates plus 4.5% that was charged in 2005 prior to the guarantee being provided. The net annual savings to the Corporation is approximately \$4.25 million assuming an average of \$170.0 million borrowed under the operating capacity.

On March 30, 2007, the Corporation borrowed \$15.0 million by way of a promissory note from a corporation wholly owned by a common director. This loan was due July 1, 2008 and bore interest at a rate of 9% per annum. This loan was repaid on January 30, 2008.

On January 30, 2008, the Corporation closed a private placement of an aggregate of \$21.0 million 8.5% convertible unsecured subordinated debentures, due January 31, 2010 (the "New Debentures") the proceeds of which were used to fund, in part, the repayment of the \$70.0 million principal amount of outstanding 8.5% unsecured subordinated debentures (the "Existing Debentures") which matured on January 31, 2008 (Note 4 – Refinancing).

On January 30, 2008, in order to fund the remaining balance of approximately \$50.0 million on the maturity of the Existing Debentures, a corporation controlled by the Chairman of the Board, provided a loan of \$50.0 million (the "Original Loan") and a \$15.0 million bridge loan (the "Bridge Loan") to the Corporation. All of the funds from the Bridge Loan and approximately \$35.0 million of the funds from the Original Loan were used to repay the balance of the Existing Debentures

and the \$15.0 million additional funds from the Original Loan was provided to the Corporation to retire \$15.0 million of subordinated debt due to a company with a common director, who is also the owner of all of the shares of such lender. Both the Original Loan and the Bridge Loan bear interest at a rate of 10% per annum calculated and payable monthly and are collateralized and subordinated to the Corporation's existing bank credit facility. The Original Loan is repayable on July 1, 2009 and the Bridge Loan was repayable on July 31, 2008. The Corporation repaid the Bridge Loan on June 24, 2008. (Note 4 – Refinancing).

Share Data and Share Consolidation

As at July 31, 2008, the Corporation had 18,185,055 common shares outstanding and 2,000,000 outstanding First Preference Shares Series A.

At the Corporation's Annual General and Special Meeting, the Corporation's shareholders approved a consolidation of Magellan's issued and outstanding common shares on the basis of one new common share for each five common shares presently issued and outstanding which was effective May 21, 2008.

Risks and Uncertainties

The Corporation manages a number of risks in each of its businesses in order to achieve an acceptable level of risk without hindering the ability to maximize returns. Management has procedures to identify and manage significant operational and financial risks.

Fluctuations in the value of foreign currencies could result in currency exchange losses.

A portion of the Corporation's revenues and expenses are currently denominated in U.S. dollars and Great British Pounds (GBP), and it is expected that some revenues and expenses will continue to be based in currencies other than the Canadian dollar. Therefore, fluctuations in the Canadian dollar exchange rate relative to these other currencies will impact the Corporation's results of operations and financial condition from period to period. In addition, the Corporation is subject to currency fluctuations from the translation of revenues, expenses, assets and liabilities of its self-sustaining foreign operations using a functional currency other than the Canadian dollar. The following table demonstrates the change in the Canadian dollar in the second quarter of 2008 in comparison to the U.S dollar and the GBP.

	Beginning of Quarter	End of Quarter	% Change
USD/CAD	1.0265	1.0197	(0.7)%
GBP/CAD	2.0407	2.0276	(0.6)%

The resulting foreign exchange losses are included in net income or loss and other comprehensive income or loss in the period. We cannot predict the effect of foreign exchange losses in the future; however, if significant foreign exchange losses are experienced, they could have a material adverse effect on our business, results of operations, and financial condition.

The agreements with labour unions representing certain of the Corporation's employees are subject to renewal.

If the Corporation is unable to renew all agreements as they become subject to renegotiation from time to time, it could result in work stoppages and other labour disturbances which could have a material adverse effect on its business. This risk may be mitigated by the ability of the Corporation to transfer work from one location to another.

The Corporation's debt is significant and may need to be refinanced and such refinancing may not be available.

The Corporation and its subsidiaries have significant debt obligations. If the Corporation is unable to meet its debt obligations, it may need to consider refinancing or adopting alternative strategies to reduce or delay capital expenditures, selling assets or seeking additional equity capital.

The Corporation renewed its bank credit agreement with its existing lender on June 24, 2008 (the "Bank Facility Agreement"). Under the terms of the Bank Facility Agreement, the Corporation has an operating credit facility, expiring on May 23, 2009, and extendable for unlimited one-year periods by agreement of the Corporation and the lenders. The Corporation's Bank Facility Agreement also requires the Corporation to maintain a specified financial ratio. The Corporation's ability to meet the financial ratio can be affected by events beyond the Corporation's control, and there can be no assurance that the Corporation will be able to meet this ratio. There is no assurance that the Bank Facility Agreement will be renewed every year or that the terms of renewal will not be materially adverse to the Corporation. This credit facility

is guaranteed by the Chairman of the Corporation. There is also no assurance that Mr. Edward's guarantee, if required, will be available beyond the term of the current commitment which ends on May 23, 2009. There is no assurance that Magellan will be in compliance with all of its bank covenants at all times during the upcoming twelve months due to unforeseen events or circumstances, some of which are outlined in the Annual Information Form - "Risks Inherent in Magellan's Business".

The Corporation may need additional financing for acquisitions and capital expenditures and additional financing may not be available on acceptable terms.

The Corporation's ability to grow is dependent upon, and may be limited by, among other things, availability under the credit facilities and by particular restrictions contained therein and the Corporation's other financing arrangements. In that case, additional funding sources may be needed, and the Corporation may not be able to obtain the additional capital necessary to pursue its internal growth and acquisition strategy or, if the Corporation can obtain additional financing, the additional financing may not be on financial terms, which are satisfactory to it.

Cancellations, reductions or delays in customer orders may adversely affect the Corporation's results of operations.

The Corporation's overall operating results are affected by many factors, including the timing of orders from large customers and the timing of expenditures to manufacture parts and purchase inventory in anticipation of future sales of products and services. A large portion of the Corporation's operating expenses is relatively fixed. Because several of the Corporation's operating locations typically do not obtain long-term purchase orders or commitments from customers, the Corporation must anticipate the future volume of orders based upon the historic purchasing patterns of customers and upon discussions with customers as to their anticipated future requirements. These historic patterns may be disrupted by many factors, including changing economic conditions, inventory adjustments, work stoppages or labour disruptions, cancellations, reductions or delays in orders by a customer or group of customers could have a material adverse effect on the Corporation's business, financial condition and results of operations.

Critical Accounting Estimates

The preparation of financial statements requires the Corporation to estimate the effect of various matters that are inherently uncertain as of the date of the financial statements. Each of these required estimates varies with respect to the level of judgment involved and the potential impact on the Corporation's reported financial results. Estimates are deemed critical when the Corporation's financial condition, change in financial condition or results of operations would be materially impacted by a different estimate or a change in estimate from period to period.

Inventories

Raw materials, materials in process and finished products are valued at the lower of unit cost and net realizable value. Due to the long-term contractual periods of the Corporation's contracts, the Corporation may be in negotiation with its customers over amendments to pricing or other terms. Management's assessment of the recoverability of amounts capitalized in inventory may be based on judgements with respect to the outcome of these negotiations. If the negotiations are not successful or the final terms differ from what the Corporation expects, the Corporation may be required to record a loss provision on this contract. The amount of such provision, if any, cannot be reasonably estimated until such amendments are finalized.

Asset Impairment

The Corporation evaluates long-lived assets for impairment when events or changes in circumstances indicate that the related carrying amounts may not be recoverable. A long-lived asset is considered to be impaired if the total undiscounted estimated future cash flows are less than the carrying value of the asset. The amount of the impairment is determined based on discounted estimated future cash flows. Future cash flows are determined based on management's estimates of future results relating to the long-lived assets. These estimates include various assumptions, which are updated on a regular basis as part of the internal planning process.

The Corporation regularly reviews its investments to determine whether a permanent decline in the fair value below the carrying value has occurred. In determining whether a permanent decline has occurred, management considers a number of factors that would be indicative of a permanent decline including (i) a prolonged decrease in the fair value below the carrying value, (ii) severe or continued losses in the investment and (iii) various other factors such as a decline or restriction in financial liquidity of an entity in which the Corporation has an investment, which may be indicative of a decline in value of the investment. The consideration of these factors requires management to make assumptions and estimates about future financial results of the investment. These assumptions and estimates are updated by management on a regular basis.

Income Taxes

The Corporation operates in several tax jurisdictions. As such, its income is subject to various rates and rules of taxation. The breadth of the Corporation's operations and the complexity of the taxing legislation and practices require the Corporation to apply judgment in estimating its ultimate tax liability. The final taxes paid will depend on many factors, including the Corporation's interpretation of the legislation and the outcomes of audits by and negotiations with tax authorities. Ultimately, the final taxes may be adjusted based on the resolution of these uncertainties.

The Corporation estimates future income taxes based upon temporary differences between the assets and liabilities that are reported in its consolidated financial statements and their tax basis as determined under applicable tax legislation. The Corporation records a valuation allowance against its future income tax assets when it believes that it is not "more likely than not" that such assets will be realized. This valuation allowance can either be increased or decreased where, in the view of management, such change is warranted.

Foreign Currency Translation

The functional currency of the Corporation is Canadian dollars. Many of the Corporation's businesses undertake transactions in currencies other than the Canadian dollar. As part of its ongoing review of critical accounting policies and estimates, the Corporation reviews the foreign currency translation method of its foreign operations to determine if there are significant changes to economic facts and circumstances that may indicate that the foreign operations are largely self-sufficient and the economic exposure is more closely tied to their respective domestic currencies. A change, if any, in translation method resulting from this review will be accounted for prospectively. The Corporation accounts for its subsidiaries in the United States and United Kingdom as self-sustaining foreign operations.

Changes in Accounting Policies

Effective January 1, 2008, the Corporation was required to adopt Canadian Institute of Chartered Accounts ("CICA"): Handbook Section 3031 "Inventories", which replaces Section 3030 "Inventories". The Corporation adopted this new section retrospectively, without restatement of prior periods. This new section provides revised guidance on the determination of cost and its subsequent recognition as an expense, including any write-down to net realizable value. It also provides revised guidance on the cost methodologies that are to be used to assign costs to inventories and expands the disclosure requirements to increase transparency.

As a result of these required changes in accounting policies, the Corporation was required to adopt the unit cost method for inventory related to its long-term contracts in replacement of the long-term average cost method. The unit cost method is the prescribed cost method under which the actual production costs are charged to each unit produced and recognized to income as the unit is sold. The Corporation previously accounted for the cost of production inventory using the long-term average cost which reflected higher unit costs at the early phase of a program and lower unit costs at the end of the program (the learning curve concept). As a result, learning curve balances of \$39,848 and a future income tax recovery of \$7,692 were charged to retained earnings on adoption of Section 3031 effective January 1, 2008. This new section also prescribed that certain development costs and program tooling costs may no longer be classified as inventory. As a result, \$67,471 of deferred development costs related to long-term contracts have been reclassified to other assets and \$10,852 of program tooling costs have been reclassified to capital assets effective January 1, 2008.

As at January 1, 2008, the effect of these accounting changes, required under Section 3031, on the Corporation's consolidated balance sheet is as follows:

	Repor December	ted, as at 31, 2007	accountir	Impact of ng changes	ted, as at y 1, 2008
Assets					
Inventories	\$	274,011	\$	(118,171)	\$ 155,840
Capital assets		245,727		10,852	256,579
Other assets		55,707		67,471	123,178
	\$	575, 44 5	\$	(39,848)	\$ 535,597
Liabilities					
Future income tax liabilities	\$	16,799	\$	(7,692)	\$ 9,107
Shareholders' equity	\$	265,927	\$	(32,156)	\$ 233,771

On January 1, 2008, the Corporation adopted three new presentation and disclosure standards that were issued by the Canadian Institute of Chartered Accountants: Handbook Section 1535, Capital Disclosures ("Section 1535"), Handbook Section 3862, Financial Instruments – Disclosures ("Section 3862") and Handbook Section 3863, Financial Instruments – Presentation ("Section 3863").

Section 1535 requires the disclosure of both qualitative and quantitative information that enables users of financial statements to evaluate (i) an entity's objectives, policies and processes for managing capital; (ii) quantitative data about what the entity regards as capital; (iii) whether the entity has complied with any capital requirements; and (iv) if it has not complied, the consequences of such non-compliance.

Sections 3862 and 3863 replace Handbook Section 3861, Financial Instruments – Disclosure and Presentation, revising and enhancing its disclosure requirements and carrying forward unchanged its presentation requirements for financial instruments. Sections 3862 and 3863 place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks.

CICA Handbook Section 1400, General Accounting was amended to include the requirement to assess and disclose uncertainties about the Corporation's ability to continue as a going concern. The new requirements came into effect for the Corporation's fiscal year beginning January 1, 2008. The amended standard did not have an impact on the valuation or classification of the Corporation's unaudited interim consolidated financial statements.

Future Changes in Accounting Policies

In February 2008, the Accounting Standards Board confirmed that Canadian generally accepted accounting principles for publicly accountable enterprises will be converged with International Financial Reporting Standards ("IFRS") effective in calendar year 2011, with early adoption allowed starting in calendar year 2009. The conversion to IFRS will be required, for the Corporation, for interim and annual financial statements beginning on January 1, 2011. IFRS uses a conceptual framework similar to Canadian generally accepted accounting principles, but there are significant differences on recognition, measurement and disclosures. The Corporation is currently evaluating the impact of the adoption of IFRS on its Consolidated Financial Statements.

Section 3064, Goodwill and Other Intangible Assets, will replace Handbook Section 3062, Goodwill and Other Intangible Assets. This new standard will be effective for fiscal years beginning on or after October 1, 2008 and the Corporation will adopt it on January 1, 2009. It establishes standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets by profit-oriented enterprises. Standards concerning goodwill are unchanged from the standards included in the previous Section 3062. The Corporation is currently evaluating the impact of the adoption of this new Section on its financial statements.

Controls and Procedures

Based on the current Canadian Securities Administrators ("CSA") rules under Multilateral Instrument 52-109, the Chief Executive Officer and Chief Financial Officer (or individuals performing similar functions as a chief executive officer or chief financial officer) are required to certify as at June 30, 2008 that they are responsible for establishing and maintaining disclosure controls and procedures and internal control over financial reporting.

Management does not expect disclosure controls and procedures to prevent all errors, misstatements or fraud. In addition, internal control over financial reporting that management has designed and established may be circumvented and rendered ineffective as a result of unauthorized acts of individuals through collusion or management override. A system of control, no matter how well conceived and operated, can provide only reasonable, but not absolute, assurance that control objectives are met. Due to the inherent limitations in a system of control, there is no absolute assurance that all control issues, which may result in errors, misstatements, or fraud, can be prevented or detected. The inherent limitations include, amongst other things: (i) management's assumptions and judgments could ultimately prove to be incorrect under varying conditions and circumstances; (ii) the impact of isolated errors; or (iii) assumptions about the likelihood of future events.

No changes were made in the Corporation's internal control over financial reporting during the Corporation's most recent interim period, that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Outlook

The outlook for the aerospace industry has been affected by the rise in fuel prices and energy costs. In the civil sector both Boeing and Airbus continue to win orders for new aircraft boosting backlogs, which are at record levels. However, the financial difficulties now being experienced by airlines has caused consolidation of routes, proposed mergers in airlines and retirement of older aircraft. On the positive side, the demand for more fuel efficient aircraft is encouraging and new models are being developed. Bombardier announced the launch of the new C series aircraft. On the defence side, new programs are continuing with all required funds fully committed. There is some pressure on finances also caused by the fuel price increases but so far governments have been able to both absorb and fund new activity. This is particularly true for the JSF and F18E/F programs.

Defence and Space sector work continues to provide additional opportunity for Magellan, and the Corporation has been successful in targeting a number of programs that require its core capabilities. The international, US-led, Joint Strike Fighter (JSF) program, and NASA's Orion space shuttle replacement program lead the way for Magellan. The JSF program, including the F-35 aircraft in three variants, and the F135 and F136 engines, represent important opportunities for Magellan. The program is expected to grow through low-rate production over the next several years, and enter full rate production in 2013. Magellan is well-advanced in its development and initial production work on the program, and expects to continue rapid progress towards production.

The combination of existing high-volume civil aircraft work within Magellan, and the ramp-up of new aircraft programs being introduced, is expected to grow Magellan's civil aerospace activities over the next decade. The Corporation also expects that defence work will grow throughout the foreseeable future, and will maintain the desired balance for Magellan between the civil and defence sectors.

On behalf of the Board

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of dollars except share and per share data)

1. ACCOUNTING POLICIES

Basis of presentation

The accompanying unaudited interim consolidated financial statements have been prepared by Magellan Aerospace Corporation (the "Corporation") in accordance with generally accepted accounting principles in Canada with respect to preparation of interim financial statements on a basis consistent with those followed in the most recent audited consolidated financial statements except as noted in note 2. Accordingly, these unaudited interim consolidated financial statements do not include all the information and footnotes required by generally accepted accounting principles for annual financial statements and therefore should be read in conjunction with the audited consolidated financial statements and notes included in the Corporation's Annual Report for the year ended December 31, 2007.

In the opinion of management, the unaudited interim consolidated financial statements reflect all adjustments, which consist only of normal and recurring adjustments, necessary to present fairly the financial position at June 30, 2008 and the results of operations and cash flows for the three and six month periods ended June 30, 2008 and 2007.

2. CHANGE IN ACCOUNTING POLICIES

Effective January 1, 2008, the Corporation was required to adopt Canadian Institute of Chartered Accounts ("CICA"): Handbook Section 3031 "Inventories", which replaces Section 3030 "Inventories". The Corporation adopted this new section retrospectively, without restatement of prior periods. This new section provides revised guidance on the determination of cost and its subsequent recognition as an expense, including any write-down to net realizable value. It also provides revised guidance on the cost methodologies that are to be used to assign costs to inventories and expands the disclosure requirements to increase transparency.

As a result of these required changes in accounting policies, the Corporation was required to adopt the unit cost method for inventory related to its long-term contracts in replacement of the long-term average cost method. The unit cost method is the prescribed cost method under which the actual production costs are charged to each unit produced and recognized to income as the unit is sold. The Corporation previously accounted for the cost of production inventory using the long-term average cost which reflected higher unit costs at the early phase of a program and lower unit costs at the end of the program (the learning curve concept). As a result, learning curve balances of \$39,848 and a future income tax recovery of \$7,692 were charged to retained earnings on adoption of Section 3031, both effective January 1, 2008. This new section also prescribed that certain development costs and program tooling costs may no longer be classified as inventory. As a result, \$67,471 of deferred development costs related to long-term contracts have been reclassified to other assets and \$10,852 of program tooling costs have been reclassified to capital assets, both effective January 1, 2008.

As at January 1, 2008, the effect of these accounting changes, required under Section 3031, on the Corporation's consolidated balance sheet is as follows:

	Repor December	ted, as at 31, 2007	accountir	Impact of ng changes	ed, as at 1, 2008
Assets					
Inventories	\$	274,011	\$	(118,171)	\$ 155,840
Capital assets		245,727		10,852	256,579
Other assets		55,707		67,471	123,178
	\$	575, 44 5	\$	(39,848)	\$ 535,597
Liabilities					
Future income tax liabilities	\$	16,799	\$	(7,692)	\$ 9,107
Shareholders' equity	\$	265,927	\$	(32,156)	\$ 233,771

Cost of revenues for the three and six month periods ended June 30, 2008 increased by \$594 and \$1,169 respectively on the adoption of this new section.

Section 3031 requires inventory to be valued at the lower of cost or net realizable value ("NRV"). The new section also allows for the reversal of previous write-downs of inventory items when the NRV of those items subsequently recovers.

CICA Handbook Section 1400 was amended to include the requirement to assess and disclose uncertainties about the Corporation's ability to continue as a going concern. The new requirements came into effect for the Corporation's fiscal year beginning January 1, 2008. The new standard did not have an impact on the valuation or classification of amounts in the Corporation's unaudited interim consolidated financial statements.

Effective January 1, 2008, the Corporation also adopted three new presentation and disclosure standards that were issued by the Canadian Institute of Chartered Accountants: Handbook Section 1535, Capital Disclosures ("Section 1535"), Handbook Section 3862, Financial Instruments – Disclosures ("Section 3862") and Handbook Section 3863, Financial Instruments – Presentation ("Section 3863").

Section 1535 requires the disclosure of both qualitative and quantitative information that enables users of financial statements to evaluate (i) an entity's objectives, policies and processes for managing capital; (ii) quantitative data about what the entity regards as capital; (iii) whether the entity has complied with any capital requirements; and (iv) if it has not complied, the consequences of such non-compliance.

Sections 3862 and 3863 replace Handbook Section 3861, Financial Instruments – Disclosure and Presentation, revising and enhancing its disclosure requirements and carrying forward unchanged its presentation requirements for financial instruments. Sections 3862 and 3863 place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks.

Future changes in accounting policy

Section 3064, Goodwill and Other Intangible Assets, will replace Handbook Section 3062, Goodwill and Other Intangible Assets. This new standard will be effective for fiscal years beginning on or after October 1, 2008 and the Corporation will adopt it on January 1, 2009. It establishes standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets by profit-oriented enterprises. Standards concerning goodwill are unchanged from the standards included in the previous Section 3062. The Corporation is currently evaluating the impact of the adoption of this new Section on its financial statements.

3. VERDICT ACQUISITION

On February 13, 2008, the Corporation acquired all the outstanding shares of Verdict Aerospace Components Ltd. ("Verdict") for consideration of \$4,240, including acquisition costs of \$127. Verdict is based in the United Kingdom and is a high precision manufacturer of make-to-print components and assemblies for the global aerospace industry. The acquisition has been accounted for by the purchase method of accounting with the results of operations of Verdict included in the consolidated financial statements from January 1, 2008, the effective date of purchase.

The purchase price has been allocated to the assets acquired and liabilities assumed based on the estimated fair values on the acquisition date. The value attributed to customer contracts is being amortized on a straight-line basis over life of the contracts.

The allocation of purchase price is preliminary and may change upon completion of an appraisal currently being performed on the acquired assets and liabilities of Verdict. The effect of any such change is not expected to be material.

The fair value of the net assets acquired and consideration paid are summarized as follows:

	\$
Net Assets Acquired	
Current assets	2,600
Long-term assets	5,284
Liabilities	(3,245)
Future income tax liabilities	(399)
Consideration Paid	
Cash	4,240

4. REFINANCING

[a] On January 30, 2008, the Corporation closed a private placement of an aggregate of \$20,950 8.5% convertible unsecured subordinated debentures, due January 31, 2010 (the "New Debentures") the proceeds of which were used to fund, in part, the repayment of the \$69,985 principal amount of outstanding 8.5% unsecured subordinated debentures (the "Existing Debentures") which matured on January 31, 2008.

The New Debentures are redeemable by Magellan for the second six months of the term at 102.5% of principal value and the holders have no conversion rights. After the second six months of the term, the New Debentures are convertible, at the option of the holder, at any time prior to maturity into common shares of Magellan at a conversion price of \$2.00 per share, which is equal to a conversion rate of 500 common shares per \$1,000 principal amount of debentures or the issuance on conversion of approximately 10,475,000 common shares in total.

The value of the holders' option to convert the convertible debentures into common shares of the Corporation is recorded as other paid in capital. As a result \$545 of the New Debentures has been attributed to the equity component of the debenture and \$20,287 (net of transaction costs) has been attributed to the debt component as at January 30, 2008. The difference between the carrying value and the face value of the debentures will be accreted through periodic charges to income included in interest expense over the life of the debenture.

[b] On January 30, 2008, in order to fund the remaining balance of approximately \$50,000 on the maturity of the Existing Debentures, a corporation controlled by the Chairman of the Board, provided a loan of \$50,000 (the "Original Loan") and a \$15,000 bridge loan (the "Bridge Loan") to the Corporation. All of the funds from the Bridge Loan and approximately \$35,000 of the funds from the Original Loan were used to repay the balance of the Existing Debentures and the \$15,000 additional funds from the Original Loan was provided to the Corporation to retire \$15,000 of subordinated debt due to a company with a common director, who is also the owner of all of the shares of such lender. Both the Original Loan and the Bridge Loan bear interest at a rate of 10% per annum calculated and payable monthly and are collateralized and subordinated to the Corporation's existing bank credit facility. The Original Loan is repayable on July 1, 2009 and the Bridge Loan was repayable on July 31, 2008. The Corporation repaid the Bridge Loan on June 24, 2008. In consideration for the provision of additional security for the Corporation's obligations under its existing secured credit facility, the standby guarantee fee payable to the Chairman of the Board of the Corporation has increased from 0.1% per annum to 1% per annum of the principal amount quaranteed.

5. INVENTORIES AND OTHER ASSETS

Due to the long-term contractual periods of the Corporation's contracts, the Corporation may be in negotiation with its customers over amendments to pricing or other terms. Management's assessment of the recoverability of certain amounts capitalized in inventory or other assets may be based on judgements with respect to the outcome of these negotiations. If the negotiations are not successful or the final terms differ from what the Corporation expects, the Corporation may be required to record a loss provision on this contract. The amount of such provision, if any, cannot be reasonably estimated until such amendments are finalized.

6. BANK INDEBTEDNESS

On June 24, 2008 the Corporation amended and restated its credit agreement with its existing lenders. The Corporation has an operating credit facility, with a syndicate of banks, with a Canadian limit of \$95,000 plus a US limit of US\$90,000 (\$186,773 at June 30, 2008). Under the terms of the credit agreement, the operating credit facility, expires on May 23, 2009 and is extendable for unlimited one-year periods by agreement of the Corporation and the lenders. Bank indebtedness as at June 30, 2008 of \$171,025 [December 31, 2007 - \$139,748] is payable on demand and bears interest at the bankers' acceptance or LIBOR rates, plus 0.875% or 5.8%]). Included in the amount outstanding at June 30, 2008 is US\$81,526 [December 31, 2007 - US\$84,171]. At June 30, 2008, the Corporation had drawn \$171,025 under the operating credit and had issued letters of credit totalling \$650 such that \$15,098 was unused and available. A fixed and floating charge debenture on accounts receivable, inventories and capital assets is pledged as collateral for the operating credit facility. The Chairman of the Board of the Corporation has provided a guarantee for the full amount of the operating credit facility.

7. CAPITAL STOCK

The following table summarizes information on share capital and related matters as at June 30, 2008:

	Outstanding	Exercisable
Common shares	18,183,315	
Common shares stock options	804,610	301,930
Preferred shares	2,000,000	

On May 13, 2008, the Corporation's Board of Directors approved a consolidation of its outstanding common shares and stock options at a ratio of 1 consolidated share for 5 pre-consolidated shares in accordance with the authority given to the Board by the Corporation's shareholders at the annual and special meeting of shareholders held on May 13, 2008. The common shares of the Corporation began trading on the TSX on a consolidated basis on May 21, 2008. All references to share and per share data for all periods presented in the consolidated financial statements have been adjusted to give effect to the 1 for 5 common share consolidation.

The weighted average number of common shares outstanding during the three and six month periods ended June 30, 2008 was 18,181,449 and 18,179,864 respectively.

8. STOCK-BASED COMPENSATION PLAN

The Corporation has an incentive stock option plan, which provides for the granting of options for the benefit of employees and directors. The maximum number of options for common shares that remain to be granted under this plan is 868,731. Options are granted at an exercise price equal to the market price of the Corporation's Common Shares at the time of granting. Options normally have a life of five years with vesting at 20.0% at the end of the first, second, third, fourth and fifth years from the date of the grant. In addition, certain business unit income tests must be met in order for the option holder's entitlement to fully vest.

The Corporation accounts for stock options issued after January 1, 2003 using the fair value method. Compensation expense recorded during the three and six month periods ended June 30, 2008 was \$295 and \$613 respectively [three and six month periods ended June 30, 2007 was \$395 and 650 respectively].

9. SEGMENTED INFORMATION

The Corporation is organized and managed as a single business segment being aerospace and the chief operating decision maker, for the purposes of resource allocations and assessing performance, views the Corporation as a single operating segment.

Capital assets are based on the country in which they are located. Domestic and foreign capital assets consist of:

As at June 30, 2008						,	s at Decemb	er S	31, 2007	
	Canada	US		UK	Total	Canada	US		UK	Total

10. ACCUMULATED OTHER COMPREHENSIVE LOSS

Other comprehensive loss includes unrealized foreign currency translation gains and losses, which arise on the translation to Canadian dollars of assets and liabilities of the Corporation's self–sustaining foreign operations. The Corporation recorded unrealized currency translation loss of \$998 for the three month period ended June 30, 2008 and an unrealized currency translation gain of \$4,300 for the six month period ended June 30, 2008 [three and six month periods ended June 30, 2007, losses of \$12,115 and 13,266 respectively]. These gains and losses are reflected in the consolidated balance sheet and had no impact on the net earnings for the period.

11. FINANCIAL INSTRUMENTS

The Corporation's policy is not to utilize derivative financials instruments for trading or speculative purposes. The Corporation may utilize derivative instruments in the management of its foreign currency and interest rate exposures.

[a] Categories of financial assets and liabilities

Under Canadian generally accepted accounting principles, financial instruments are classified into one of the following five categories: held for trading, held to maturity investments, loans and receivables, available-for-sale financial assets, or other financial liabilities. All financial instruments, including derivatives, are included on the consolidated statement of financial liabilities, which are measured at fair value except for loans and receivables, held-to-maturity investments and other financial liabilities, which are measured at amortized costs. Held for trading financial investments are subsequently measured at fair value and all gains and losses are included in net income in the period in which they arise. Available-for-sale financial instruments are subsequently measured at fair value with revaluation gains and losses included in other comprehensive income until the instruments is derecognized or impaired.

The carrying value of the Corporation's financial instruments are classified as follows:

	As at June 30, 2008	As at December 31, 2007
Held for trading ¹	1,592	5,246
Loans and receivables ²	41,182	35,659
Financial liabilities ³	384,451	345,517

¹ Includes cash and investments, which are classified as other assets

The Corporation has determined the estimated fair values of its financial instruments based on appropriate valuation methodologies, however, considerable judgment is required to develop these estimates. Accordingly, these estimated fair values are not necessarily indicative of the amounts the Corporation could realize in a current market exchange. The estimated fair value amounts can be materially affected by the use of different assumptions or methodologies. The methods and assumptions used to estimate the fair value of financial instruments are described below:

Cash, accounts receivable, bank indebtedness and accounts payable and accrued charges

Due to the short period to maturity of these instruments, the carrying values as presented in the consolidated balance sheets are reasonable estimates of their fair values.

Long-term debt

The fair value of the Corporation's long-term debt, based on current rates for debt with similar terms and maturities, is \$63,800 at June 30, 2008.

Convertible debentures

The fair market value of the Corporation's Convertible Debentures, calculated by discounting the expected future cash flows at prevailing interest rates, is estimated at its carrying value.

As at June 30, 2008, the carrying amount of the financial assets that the Corporation has pledged as collateral for its long-term debt facilities was \$42,644.

[b] Forward foreign exchange contracts

The Corporation has entered into forward foreign exchange contracts to mitigate future cash flow exposures in U.S. dollars. Under these contracts the Corporation is obliged to purchase specific amounts of U.S. dollars at predetermined dates and exchange rates. These contracts are matched with anticipated operational cash flows in U.S. dollars.

The Corporation has foreign exchange contracts outstanding at June 30, 2008 as follows:

	Amount	Exchange rate
Maturity – less than 1 year – U.S. Dollar	\$26,050	1.01532

The mark-to-market on these financial instruments as at June 30, 2008 was an unrealized gain of \$115, which has been recorded in net earnings for the period.

² Includes accounts receivables

³ Includes bank indebtedness, accounts payable and accrued charges, long-term debt, and the debt component of the convertible debentures

[c] Risks arising from financial instruments and risk management

The Corporation thoroughly examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks. These risks may include credit risk, liquidity risk, currency risk and interest rate. Where material, these risks are reviewed and monitored by the Board of Directors.

Credit risk

Credit risk arises from cash and cash equivalents held with banks and financial institutions as well as credit exposure to clients, including outstanding accounts receivable. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing credit risk is to prevent losses in financial assets. The Corporation is also exposed to credit risk from the potential default by any of its counterparties on its foreign exchange forward contracts. The Corporation mitigates this credit risk by dealing with counterparties who are major financial institutions that the Corporation anticipates will satisfy their obligations under the contracts.

The Corporation, in the normal course of business, is exposed to credit risk from its customers, substantially all of which are in the aerospace industry. The Corporation sells the majority of its products to large international organizations with strong credit ratings. Therefore, the Corporation is not exposed to significant credit risk and overall the Corporation's credit risk has not changed significantly from the prior year.

The carrying amount of accounts receivables are reduced through the use of an allowance account and the amount of the loss is recognized in the income statements within administrative and general expenses. When a receivable balance is considered uncollectible, it is written off against the allowance for accounts receivable. Subsequent recoveries of amounts previously written off are credited against administrative and general expenses.

The following table sets forth details of the age of the trade accounts receivable as at June 30, 2008:

	\$
Total trade accounts receivable	31,970
Less: Allowance for doubtful accounts	(227)
Total trade accounts receivable, net	31,743
Of which:	
Not overdue	27,837
Past due for more than one day but not more than three months	3,027
Past due for more than three months but not more than six months	795
Past due for more than six months but not more than one year	236
Past due for more than one year	75
Less: Allowance for doubtful accounts	(227)
Total trade accounts receivable, net	31,743

Liquidity risk

The Corporation's objective in managing liquidity risk is to ensure that there are sufficient committed loan facilities in order to meet its liquidity requirements at any point in time. The Corporation has in place a planning and budgeting process to help determine the funds required to support the Corporation's normal operating requirements on an ongoing basis, taking into account its anticipated cash flows from operations and its operating facility capacity. The primary sources of liquidity are the operating credit facility and the indebtedness provided by a company controlled by a common director which require the continued support by the Chairman of the Board of the Corporation. As at June 30, 2008, the Corporation had undrawn lines of credit available to it of \$15.098.

The contractual maturities of the Corporation's financial liabilities were presented in the Corporation's consolidated financial statements for the year ended December 31, 2007.

Currency risk

The Corporation operates internationally, which gives rise to a risk that its income, cash flows and shareholders' equity may be adversely impacted by fluctuations in foreign exchange rate. Currency risk arises because the amount of the local currency receivable or payable for transactions denominated in foreign currencies may vary due to changes in exchange rate ("transaction exposure") and because the non-Canadian dollar denominated financial statements of the Corporation's subsidiaries may vary on consolidation into the reporting currency of Canadian dollars ("translation exposures"). The Corporation uses derivative financial instruments to manage foreign exchange risk with the objective of minimizing

transaction exposures and the resulting volatility of the Corporation's earnings.

The most significant transaction exposures arise in the Canadian operations where significant portions of the revenues are transacted in U.S. dollars. As a result, the Corporation may experience transaction exposures because of the volatility in the exchange rate between the Canadian and U.S. dollar. Based on the Corporation's current U.S. denominated net inflows, as of June 30, 2008, fluctuations of +/-1% would, everything else being equal, have an effect on net earnings and on other comprehensive income for the three months ended June 30, 2008 of approximately +/-\$37 and \$1,000 respectively.

Interest rate risk

The Corporation is exposed to interest rate risk in its floating rate bank indebtedness. At June 30, 2008, \$180,352 of the Corporation's total debt portfolio is subject to movements in floating interest rates. In addition, a portion of the Corporation's accounts receivable securitization programs are exposed to interest rate fluctuations. The objective of the Corporation's interest rate management activities is to minimize the volatility of the Corporation's earnings. The Corporation monitors its exposure to interest rates and has not entered into any derivative contracts to manage this risk. A fluctuation in interest rates of 100 basis points (1 percent) would have impacted the amount of interest charged to net earnings during the quarter by approximately +/- \$400.

12. MANAGEMENT OF CAPITAL

The Corporation's objective is to maintain a capital base sufficient to maintain investor, creditor and market confidence and to sustain future development of the business. Management defines capital as the Corporation's shareholders' equity and interest bearing debt, including the debt and equity components of the convertible debenture.

As at June 30, 2008, total managed capital was \$497,823, comprised of shareholders' equity of \$241,306 and interest-bearing debt of \$256,517. Included in interest bearing debt is the debt component of the convertible debentures of \$20,371, where the associated interest expense is a non-cash charge.

The Board of Directors does not establish quantitative return on capital criteria for management; but rather promotes year over year sustainable profitable growth. The Board of Directors also reviews on an annual basis, the dividend policy, with respect to the Corporation's common and preference shares.. There were no changes in the Corporation's approach to capital management during the period.

The Corporation must adhere to covenants in its credit facilities that are used to backstop its operating credit facility. As at June 30, 2008, the Corporation was in compliance with these covenants.

13. EMPLOYEE FUTURE BENEFITS

The total benefit cost in the registered plans for the three and six month periods ended June 30 includes the following components:

	Three-months ended June 30			Six-months ended June 30				
(Expressed in thousands)		2008		2007		2008		2007
Current service cost	\$	504	\$	467	\$	1,008	\$	934
Interest cost on projected benefit obligations		1,569		1,577		3,138		3,154
Expected returns on plan assets		(1,844)		(1,771)		(3,688)		(3,541)
Amortization of net actuarial loss		119		148		238		297
Amortization of past service costs		170		120		340		240
Net benefit cost recognized	\$	518	\$	541	\$	1,036	\$	1,084

14. RELATED PARTY TRANSACTIONS

During the three and six month periods ended June 30, 2008, the Corporation sold receivables to a corporation wholly owned by a common director in the amount of \$122,619 and \$207,069 respectively [2007 - \$48,555 and \$74,572], for a discount of \$823 and \$1,508 respectively [2007 - \$682 and \$943] representing an annualized interest rate of 7.5% [2007 - 7.5%]. Included in this balance, as at June 30, 2008, is a reserve of \$6,510 [2007 - \$4,281].

On January 30, 2008, two directors of the Corporation purchased \$18,150 of the \$20,950 8.5% convertible debentures issued by the Corporation (note 4).

15. SUPPLEMENTARY INFORMATION

Foreign exchange gain or loss on the conversion of foreign currency denominated working capital balances and debt for the three and six month periods ended June 30, 2008 was a loss of \$534 and a gain of \$1,056 [three and six month periods ended June 30, 2007, loss of \$2,154 and \$2,523 respectively].

16. COMPARATIVE CONSOLIDATED FINANCIAL STATEMENTS

The comparative consolidated financial statements have been reclassified from statements previously presented to conform to the presentation of the 2008 consolidated financial statements.
