EURAVIA ENGINEERING AND SABENA TECHNICS SIGN ENGINE MAINTENANCE AGREEMENT

Euravia Engineering & Supply Co Limited (“Euravia UK”) recently signed a multi-year engine maintenance contract with Sabena technics DNR (“Sabena”) for their Pratt & Whitney Canada (P&WC) PT6A-60A engines, modules, parts, accessories and components. This agreement represents an important opportunity for Euravia UK to work alongside Sabena, whose technical expertise and global maintenance capabilities have been advancing the aviation industry for more than 50 years.

Euravia UK is excited to join Sabena’s global network of engine maintenance experts, supporting civil, military, and government fleets across the world. As a specialist aviation company, Euravia UK delivers high-quality, cost-effective maintenance, repair and overhaul (MRO) services for a wide range of gas turbines and offers a comprehensive support framework for PT6 engine operators worldwide.

Euravia UK’s General Manager, Mr. Paul Sconce said, “Sabena’s commitment to operational excellence ensures that fleets across all sectors remain safe, reliable, and mission-ready—and we are pleased to collaborate with this trusted industry partner.”

Euravia UK has an established international reputation for delivering cost-effective, high quality gas turbine engines, with exceptional performance and reliability. As a modern MRO Centre of Excellence specializing in PT6 engines, Euravia UK is fully compliant with UKCAA, EASA, GACA and FAA requirements, and holds Part 145 approval for P&WC PT6A and PT6T engines.

About Euravia

Euravia Engineering and Supply Co. Ltd (<https://www.euravia.aero>), and Euravia North America (<https://www.euravianorthamerica.com>) are wholly-owned subsidiaries of Magellan Aerospace Corporation.
